AMENDMENT

COMMISSIONER FOR PATENTS
Washington, D. C. 20231

Sir:

The following amendments and remarks are submitted in response to the Official Action dated June 19, 2002.

IN THE SPECIFICATION:

Please replace the paragraph beginning on page 11, line 3 with the following:

a'
The length extension ratio of the connecting parts 210 to the bridge parts 190 should be preferably about 2.5 ~ 3.0 :1, and more preferably should be about 2.78 : 1. In this manner, any ruptures of the connecting parts 210 due to external impacts can be prevented.

Please replace the paragraph beginning on page 12, line 22 with the following:

a²
Preferably, the width of the bridge parts 190 is decreased by 1/8 compared with the extension of the length of the connecting parts 210. To define it more specifically, when the length of the connecting parts 210 is 275μ m, the width of the bridge parts 190 is made to be 184μ m which is equivalent to the conventional bridge part length 218μ m less 34μ m..
